About Our Company

A Brief Story About Coral

Coral Industrial and Marine Solutions is a trusted provider of turnkey solutions across the marine and industrial engineering sectors. We specialize in a comprehensive range of services including marine engine repairs, generator servicing, heavy machinery repairs, industrial radiator installation and RO plant maintenance. Our capabilities extend further to propulsion systems, hydraulic repairs, underwater hull cleaning, and the supply of genuine spare parts.

With a global presence spanning the Maldives, Sri Lanka, the Sultanate of Oman, and now expanding into New Zealand, we bring world-class engineering expertise directly to our clients' operations. Our international footprint is backed by an extensive global network for spare-parts supply giving our clients fast access to genuine components wherever they operate, without the delays and downtime of conventional sourcing. We focus on minimizing operational downtime through expert technical consultation and comprehensive annual maintenance agreements, and we provide skilled engineering manpower tailored to each client's specific requirements.

Coral is recognised for its commitment to innovation, quality, and safety. Our high-performance solutions are engineered to meet the unique needs of every client, from resort powerhouses and luxury yachts to commercial fleets and industrial facilities ensuring efficiency and reliability in every operation.

Vision

To be the company that brings global engineering to the Maldives - combining a worldwide network, deep experience, and skilled people to serve our clients better than anyone before

Mission

Our mission is to bring world-class engineering capability to the Maldives by uniting a global network, deep technical experience, and highly skilled professionals under one purpose: keeping our clients' vessels, plants, and machinery running. We work to minimize operational downtime through expert consultation, proactive maintenance, and rapid response drawing on a worldwide spare-parts supply network to deliver genuine components wherever and whenever they are needed. In everything we do, we are guided by a commitment to innovation, quality, and safety, ensuring efficiency and reliability in every operation we support.

Core Business

The full spectrum of marine and industrial engineering

01

Marine Engineering

Repair, overhaul, and maintenance of marine engines, propulsion systems, and hulls for yachts, tugs, and commercial vessels keeping fleets seaworthy with minimal downtime.

02

Power Plants & Generators

Installation, servicing, and major overhauls of diesel power plants, generators, and switchgear that keep resort powerhouses and industrial facilities running without interruption.

03

Heavy Machinery & Industrial Solutions

Diagnostics, repair, and refurbishment of heavy equipment and industrial machinery from RO plants and radiators to hydraulic and pump systems restoring reliability under demanding conditions.

04

Annual Maintenance Contracts (AMC)

Tailored agreements that take full responsibility for the upkeep of vessels, generators, and plants minimizing downtime and extending asset life so clients can focus on their operations.

CORAL

INDUSTRIAL AND MARINE SOLUTIONS

— • MALDIVES • —

24X7 AVAILABILITY. RELIABLE SERVICE.

At Coral Industrial and Marine Solutions,
we keep your operations moving—
24 hours a day, 7 days a week.
Marine and industrial operations don't stop,
and neither do we.
Our team is always ready to respond—
anytime, anywhere.

Day or night, you can count on Coral.

24X7 EMERGENCY SUPPORT

Round-the-clock
assistance for urgent
breakdowns and
operational issues.

FAST RESPONSE

Quick mobilization
to minimize downtime
and keep your
operations moving.

EXPERIENCED TEAM

Skilled engineers and
technicians with hands-on
experience across marine
and industrial systems.

RELIABLE SERVICE

Quality workmanship,
safe practices and
dependable solutions
you can trust.

REDUCED DOWNTIME

Effective solutions
designed to improve
reliability and extend
equipment life.

Our Service Portfolio

The full spectrum of marine and industrial engineering

- Rewinding, servicing, varnishing, and baking of all types of electric motors
- Annual maintenance contracts for generators, fire engines, and all types of industrial engines
- Comprehensive maintenance of boiler and heating systems
- Repair and servicing of diesel power plants
- Installation and commissioning of all types of industrial machinery
- Inspection, diagnostics, and expert troubleshooting with effective solutions
- Any type of machining work
- Complete engine repair and overhaul services for any type and any brand

**Bringing precision, reliability
and global engineering
standards to every marine and
industrial service we deliver.**

- Pump Systems: Routine preventive maintenance, repairs, and complete overhauls for various industrial pumps.
- Factory & Machining Refurbishment: Comprehensive refurbishing of industrial zone factories, including machining-related repairs and modifications.
- Industrial Boiler Services: Servicing and repairing industrial boilers for sectors such as power generation (resort hotel powerhouses), washing/drying plants, hospitality (star hotels), and dairy industries.
- Electrical Systems: Servicing and repair of all types of switchgear, control panels, and switchboards.
- Turbine Maintenance: Maintenance and repair services for steam and gas turbines.
- Fabrication & Installation: Specialized steel fabrication and on-site installation services.

Engines, hulls, and systems — all under one team

Engine and Machinery Repairs

- Overhauling main engines (diesel/gas turbines)
- Repair and maintenance of auxiliary engines
- Troubleshooting and diagnostics of engine issues
- Replacement or repair of crankshafts, cylinders, pistons, and other engine components
- Calibration of fuel injection systems and other engine parts.

Hull Repairs

- Welding, cutting, and patching steel or aluminum hulls
- Repairing cracks, dents, and corrosion on the hull
- Blasting and painting to prevent corrosion
- Hull cleaning and antifouling coating application

Propulsion System Maintenance

- Propeller repair, balancing, or replacement
- Maintenance and repair of shafts, bearings, and couplings
- Repair or replacement of rudders and steering gear systems

Electrical and Automation Systems

- Repair or replacement of wiring, switches, and panels
- Troubleshooting control and automation systems
- Servicing of navigational and communication equipment
- Power distribution system repairs (generators, circuit breakers)

The full force of our expertise, at your service

Plumbing and Piping Repairs

- Overhauling or replacing water, fuel, and hydraulic pipelines.
- Repairing valves, pumps, and fittings.
- Leak detection and pipeline testing.

Deck and Superstructure Repairs

- Maintenance of winches, cranes, and mooring systems.
- Repairing hatches, doors, and bulkheads.
- Overhauling accommodation systems like air conditioning and ventilation.

Safety Equipment and Systems

- Inspection and maintenance of firefighting systems.
- Repairing lifeboats, life rafts, and davits.
- Servicing alarm and monitoring systems.

Structural Modifications

- Altering vessel structures for upgraded functionality.
- Conversion of cargo spaces or machinery installations.

Survey and Inspection Support

- Preparing for statutory and class inspections.
- Assisting in damage surveys and structural assessments

Specialized Services

- Underwater inspection and repairs using divers or ROVs.
- Dynamic positioning system repairs.
- Ballast water treatment system maintenance and upgrades.

OUR TEAM

MTU Experts

-  Over 15 years of experience in MTU
-  Wide knowledge of various machinery and systems, covering their operation, major overhauls, repair, and maintenance
-  Key Technical Systems Expertise
-  Diesel engines/generators | Yamaha 40HP/90HP/120HP engine.
-  Air conditioning and refrigeration plants | Propulsion shaft alignment.
-  Maintenance of Water jets and Articulated Surface Drives | Reverse Osmosis plants.
-  Centrifugal, piston and gear pumps | Hydraulics/pneumatics system.
-  HP/LP Air systems

Caterpillar Experts

- Specialized in repairing/overhauling Caterpillar 3400 series, 3500 series, "C" series
- Proficient in scheduling preventive maintenance and using Caterpillar ET Connected & SIS
- Experience under the Caterpillar dealer in Qatar and Maldives
- Capable of overhauling and testing machines for operating efficiency and fabricating needed parts from sheet metal
- Experience in other brands (SANY / Komatsu / Hitachi / KOBELCO / Olympian / Mitsubishi)

Cummins Experts

Performing major overhauls of all type of Cummins engines.

Routine Services and Repairs: Carrying out routine services and running repairs on all types of Cummins engines.

Troubleshooting and Diagnostics: Expertise in troubleshooting & fault diagnosis of Cummins engines.

Fuel System Calibration and Service: Proficiency in the calibration and service of Cummins PT pump & all kind of injectors.

Experienced in the service & calibration of other fuel pumps & injectors.

Electrical Experts

Installation and Repair: Responsible for installing all types of electrical equipment, control panels, power generators, and marine diesel engines

Design Capability: Design and modify all types of power & control panels using electrical drawings

Diagnostics Software: Electronic Technician software (CAT ET) for Caterpillar gen sets and heavy equipment

Alternator Servicing: Servicing main alternators ranging from 20kVA to 2000kVA

Engine Management: Replacing Engine Control Modules (ECM) using CAT ET software with factory authority

OUR COMMITMENT TO THE MALDIVES

Powering the Industries That **Power** the Maldives.

Tourism and industry are the engines of the Maldivian economy — and those engines must never stop. Coral exists to keep those operations running. We bring a proven global engineering network — spanning Oman, Sri Lanka, and beyond — directly to the Maldives, raising local capability to international standards so the nation's most critical industries stay reliable, efficient, and world-class.

“When the Maldives needs engineering it can trust, we bring the world to you.”

KEEPING THE MALDIVES RUNNING

We keep resort power plants, marine fleets, and industrial systems operational around the clock — protecting the guest experience and the businesses built on it.

SUSTAINING TOURISM & INDUSTRY

Reliable engineering underpins a reliable economy. By preventing downtime, we help safeguard the tourism and industrial sectors at the heart of Maldivian livelihoods.

INTERNATIONAL STANDARDS & BEST PRACTICES

We bring globally proven methods, diagnostics, and engineering discipline to every project — the standards the Maldives deserves.

GENUINE PARTS & SPECIALIST SKILL SETS

A worldwide spare-parts network and specialist expertise mean the right part, fitted right, the first time — for repairs that truly last.

ENGINEERING EXCELLENCE. **LOCAL IMPACT.**

RELIABILITY

Maximizing uptime for critical operations.

RESPONSIVENESS

24/7 support when you need us most.

LOCAL CAPABILITY

Building Maldivian talent to global standards.

GLOBAL NETWORK

Connected expertise across borders.

SUSTAINABLE FUTURE

Engineering today for a stronger tomorrow.

CORAL
INDUSTRIAL AND MARINE SOLUTIONS

Coral Industrial and Marine Solutions is your trusted engineering partner in the Maldives. With a commitment to **quality**, **safety**, and **performance**, we help power the industries that power the nation.
